DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-83, and 85-90**, drawn to a *lightpath* restoration scheme for an *optical* network, classified in class 370, subclass 216
 - II. **Claims 84 and 91**, drawn to an IP restoration scheme using *layer 2 tunneling*, classified in class 370, subclass 228.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I and II present slightly different problems and solutions. In particular, although both inventions are directed towards IP restoration, Invention I is directed to a problem and solution using optical light paths (i.e., physical layer 1) where Invention II is directed to a problem and solution using layer 2 tunneling (i.e., data link layer 2). Thus the inventions have different modes of operations and/or functions since the layering is different. Specifically, note applicant's claims 82 and 89 solve the problem using optical lightpaths while claims 84 and 91 solve a "similar problem" (i.e., the problems are slightly different since the layering is different) using layer 2 tunneling. Hence claims 84 and 91 are distinct over claims 82 and 89.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2663

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. An attempt was made to contact the applicant Benjamin Lee, however, applicant's phone number (908) 221-5478 was currently disconnected.
